

DRIVE-THRU INSIGHTS REPORT

ACTIONABLE DATA & INSIGHTS TO MAXIMIZE DRIVE-THRU SALES

The Drive-Thru Insights Report delivers actionable data and insights to improve drive-thru performance and customer experience by leveraging drive-thru timing system data within Envysion's cloud-based video management software. Featuring multi-camera playback of each vehicle journey and the associated transaction data, the report enables quick-service and fast-casual restaurants to easily identify bottlenecks in the vehicle flow, detect potential internal theft, and ultimately maximize drive-thru sales.

QUICK AND EASY SEARCH

The tabular and sortable report makes it easy to identify restaurants that struggle to keep up with the speed of service expectations and to drill down on vehicles that have caused challenges for the team.

CUSTOMIZABLE FILTERS

Tailor your report using the advanced filtering tool and save preferences to quickly revisit the data most pertinent to you and surface the at-risk moments in the drive-thru.

POINT-OF-SALE TRANSACTION MATCHING

Review video footage and associated transaction data side by side to gain insights into the cause of bottlenecks or potential internal theft by isolating vehicles not linked to transaction data.

MULTI-CAMERA PLAYBACK

Get the full picture of what is happening inside and outside the restaurant to diagnose operational issues impacting the speed of service or to determine if any theft has occurred.

DAILY NOTIFICATIONS

Turn on Daily Notifications to have your reports delivered directly to your inbox for quick insights about your drive-thru performance and potential risk to prioritize your day.

SAVE AND SHARE VIDEO CLIPS

Turn video evidence into action by clipping, saving and sharing video clips with the team to create a conversation and steps for improvement.

ACCESS FROM ANYWHERE

View the report and video footage from your desk or on the go via any mobile device.
